

Office Rental

We have deliberately chosen to establish a separate modest (2 rooms) project-office in order to be able to keep all financial implications of the implementation of the project completely separate. Preferably the office is adjacent to EEC-Nepal. In this manner we reduce the risk of expenditures being assigned to the project in an unjust manner. Particularly in the case of rent, electricity, telephone, internet, office supplies this might become indistinguishable. We think this is particularly important to acknowledge in advance considering the audit that will take place afterwards. It is essential to reduce the risk of ineligible expenditures at that time. In order to achieve this we find it crucial to have all supporting documents of the project in one separate administration, which would be more complicated if expenditures supporting documents only partially relate to the underlying Asia-Invest project.

In the second month of the project we will find a space to rent, buy some required furniture and arrange telephone and internet connection. Within this month we will easily be able to get ready and to start the actual work.
